4.18 SAFELY

The maximum capacity of the ships indicates the maximum number of passengers that can be safely boarded: our crew checks that the number of passengers doesn't exceed and prevent the boarding of further passengers. Our ships are provided with all the security devices set out by the national regulation and with all the instructions of the procedures that passengers need to follow in case of emergency.

4.19 IN CASE OF SICKNESS ON BOARD

Events of sickness have to be reported to the staff, so that medical aid can be called immediately.

5 OUR VALUES, OUR COMMITMENT

We are at your service to ensure a high quality transport in terms of:

- **Punctuality:** we are committed to allow the connections with other public transport services and the punctuality of your daily activities and your free time. Any delay is therefore directly reported by our ship commanders and are valued by our offices.
- **Certainty of the connection to/from Monte Isola:** to the benefit of residents of Monte Isola and tourists who visit the island, we ensure the connection to and from Monte Isola in every climatic situation, even at night. On request of healthcare professional (118) we provide an emergency call service available 24/7/365 on the route Peschiera-Sulzano, regardless of the regular shipping services that, if necessary, could be interrupted in order to transport patients and medical staff.
- **Intermodality:** we share all the values of public transport, especially those regarding the environmental sustainability and the accessibility to citizens of any economic condition. We thus adhere to the regional fare system IO VIAGGIO (which allows to use the majority of transport services in the region with a single travel pass). We have always allowed the transport of bicycles on board, with reduced fares. Our maps show the interconnections with other public transport services and our schedules take into consideration the different connections available.
- **Accessibility:** Mobility is a right for everybody, that's why we constantly work to avoid any kind of discrimination (based on age, disability, economic conditions and other factors of

diversity) in access to our public transport services. We want people with any kind of disability (and their guide dogs), as well as foreigners, to feel welcome on board our ships: we provide assistance in the operations of boarding and landing and we work with the Region, in order to refit our ships and piers so that they become welcoming for all of our passengers. Information about our services is available in Italian and in English.

- **Safety:** the safety of our passengers and of our staff are among our priorities. On board you can find all the security devices established by the current regulation of inland navigation. Moreover, we commit to urge the attention of the Ministry of Transports on the theme of security, also considering the technological development of inland navigation.
- **Cleaning:** our ships are cleaned every day before service. During the service, the crew maintains the ships clean. In case of extended inactivity or maintenance of the vessels, before coming back into service, ships have to be cleaned by a cleaning firm.
- **Respect for the environment:** the lake is a heritage of our territory, on which tourism and fishery are based. We protect the water of our lake and we ask our users to pay the same attention. For this reason, toilettes on our vessels don't discharge directly into the waters of the lake. We cooperate with the Region to plan the modernisation of our ship, in order to reduce our impact on the environment.
- **Innovation:** we are developing an electronic ticketing system that will allow the automatic provision of tickets at piers and to speed up boarding operations.

5.1 POLICY FOR OCCUPATIONAL SAFETY AND HEALTH AND THE ENVIROMENT

Our policy is focused on both people and the environment. We work hard to improve occupational safety and health, to reduce the impact of our activities on the environment and to prevent occupational injuries and pollution.

With specific System procedures (called "Sistema di Gestione per l'Ambiente e la Salute e Sicurezza sul Lavoro") we systematically regulate company processes, in order to achieve the following objectives:

- Continuous improvement of the System procedures;
- Involvement and responsible participation of the staff (and safety representatives) to every level of System;

- Creation and maintenance of an infrastructure to prevent the risk of injuries and the environmental impacts of our activities;
- Attention to the human resources and to their awareness of the relevance of their role in the company, through staff training;
- Commitment to a more efficient use of natural and energy resources and a gradual reduction of our environmental impact;
- Constant monitoring of our environmental, energetic, occupational health and safety performances to improve our processes;
- Acquisition of certifications based on international standards of environment and occupational health and safety;
- Constant update based on the current legislation and on all the other conditions agreed upon by our company;
- Respect of the legislation regarding the environment and occupational health and safety;
- Periodic review of our current policy and System;
- Dissemination inside the company of the System objectives and the related programmes of implementation.

We refer to the requirements specified by the standards “UNI EN ISO 14001:2015” and the guidelines “UNI-INAIL” of 2001, as well as to the organizational model set out by the national law (D.Lgs 231/2001).

6 OBJECTIVES, MONITORING AND COMMITMENT FOR THE IMPROVEMENT

For the 2019 we want to reach our quality objectives and continue the initiatives that will permit us to improve our offer. We will monitor the achievement of the results and verify the satisfaction of users. We will analyse punctuality, regularity of the service, the connection with Monte Isola and users’ participation (number of subscriptions to mailing list and social media).

7 SUGGESTIONS, COMPLAINTS AND REFUNDS

On board every ship, passengers can ask for the complaints register to report inefficiencies. Reports can be forwarded through:

Regular mail	Navigazione lago d'Iseo S.r.l., via Nazionale, 16 -24062 Costa Volpino (BG)
E-mail	info@navigazione lagoiseo.it
Certified e-mail	info@pec.navigazione lagoiseo.it
Complaints page on the institutional website	www.navigazione lagoiseo.it/en/scheduled-services/complaints/

If you contact us by telephone, you will not be advised to send a statement with your name, surname and address (where the company can send an answer), as well as any useful information to identify the journey the complaint refers to (date, time, etc....). Every notification is sent to the offices for the following actions.

Refund requests are examined and valued by the administration. Whenever it receives a notification, our company sends a confirmation e-mail.

8 COMPENSATION FOR DAMAGE

Our insurance covers damage to passengers and their property due to the responsibility of the company. The passengers need to report incidents (explaining what happened) to the crew immediately and to formally request compensation for damage within the time allowed by national law.

9 IN CASE OF FINDING OR LOSS OF PROPERTY

In case of finding personal objects on board of ships, the commander gives them to the administrative office. Lost property is stored by our offices and can be collected by the owners; after the identification of the claimant, he will be asked to subscribe a receipt. In case of finding personal documents (passports, identity cards...), they are sent to law forces (Carabinieri) in Costa Volpino, where they can be collected.

10 IN CASE OF FINDING OR LOSS OF PROPERTY

In case of strike, the connections to and from Monte Isola are guaranteed in certain time slots, communicated by trade union organizations. Emergency calls (118) to and from Monte Isola are always available. Time slots are published on our website and on bulletin boards in our ticket offices and near our piers.
